

**BIRD'S MOST VERSATILE RF POWER METER IS ALSO ONE OF THE INDUSTRY'S FASTEST AND EASIEST TO OPERATE.**

The Model 5000's operation is quick and intuitive, even for novice users. The large, dual 5-digit LCD shows complete measurement information at a glance.

- 1 Unique digital/analog display shows complete measurement data, signal trends, Speed Key functions and battery status. Back-lit, high-contrast LCD views easily in any light.
- 2 Easy-to-use, calculator-like user interface controls all functions with just a few keystrokes. Display prompts guide you through instrument settings.
- 3 Speed Keys with display legends rapidly select instrument operating mode and display parameters.
- 4 Compact ergonomic case is comfortable to hold and operate. Internal rechargeable Nickel-Metal Hydride (NiMH) batteries provide 100 hours operation per charge.
- 5 Serial connector to sensor facilitates hand-held operation and remote sensing.
- 6 Serial connector for operation with a personal computer and Bird PC Tool software.

**High-Contrast Back-Lit Liquid Crystal Display**
